Celebrating Our 31st Year

Manhattanization

We Deserve Better

by Christopher L. Bowman & Keith Bogdon

s San Franciscans, particularly those of us who live on the Westside, we are witnessing our City bursting at the seams, with over 883,000 people. In just 7.5 years, we have grown by 78,000 residents.

The question we face is: How many more people can we accommodate without adversely affecting our safety, quality of life, the character of our neighborhoods? Our crumbling infrastructure, which is vulnerable to another major earthquake, was built for a city of just 715,000 people?

ABAG, with its Plan Bay Area 2040, calls for 1,100,000 people by 2040. We learned at a recent forum on the future of Transportation in San Francisco, the SF Planning Department projects our City to balloon to over 1,500,000 people by 2065!

Enough is enough!

Almost all the dialogue over housing in San Francisco revolves around the belief that we must significantly accelerate the construction of new housing - half blocks or block-large massive construction of "sky's the limit" condos and apartment buildings. Advocates of denser housing have declared that the era of the single family home is over. They are also dictating what kind of housing will be constructed - very low income, "affordable", market rate, luxury, mini units or 2-3 bedroom units that can accommodate growing families.

ABAG, with its Plan Bay Area 2040, calls for 1,100,000 people by 2040.... the SF Planning Department projects our City to balloon to over 1,500,000 people by 2065!"

Opponents of more housing in SF say that the surrounding Bay Area counties need to do their fair share of adding housing. Even if some communities are not doing their fair share, they suffer the same massive infrastructure problems we have in San Francisco, including crumbling roads, traffic congestion, the need for more schools, fire stations, and more water. They, as we, are challenged by over-burdensome regulatory hurdles and exorbitant building costs.

Both sides are fundamentally wrong. More of the same, while throwing more money at the problem, will not solve the issue of affordability. We must reject the agendas of the special interests who are vested in the tired, failed policies of the status quo, freeing us to think outside the box.

The solution isn't with Supply-Side Economics. Indeed, we can't build ourselves out of this crisis in our small city of not even 47 square miles. The solution is achievable with Demand-Side Economics.

The inflationary pressures on the housing market has been manufactured by bad public policies, e.g., tax breaks for Twitter and other tech companies so they would bring their jobs and employees from outside the City into San Francisco, as well as adverse side effects from Prop.13 and rent control.

Homeowners and renters feel trapped in their current housing. Under current state law, if an empty nester/ homeowner over 55 wants to downsize, they may end up paying far more in property taxes than if they stayed put. The same is true for long-time renters who can't afford to move to a smaller apartment because they will be paying far more in rent.

So we make the following three modest proposals: When the tax breaks for Twitter and other tech companies expire next year, don't renew them, and don't provide additional tax breaks to the tech industry.

Government should not be in the business of

What If Things Went Bad After An Earthquake?

by Nancy Wuerfel

he City does not have exclusive authority to use 79% of our locally stored water in three City reservoirs because a State Water Code mandates that we must share this water with peninsula customers in an emergency. But the San Francisco Public Utilities Commission (SFPUC) is ignoring this law and telling us to rely on Sunset reservoir's water for post-earthquake firefighting - as if the City did have unilateral rights to the water. They are even planning to ask voters to approve a General Obligation bond in 2020 to replace the reservoir's water pipelines "to help fight fires," knowing that the bond projects will not be guaranteed access to the water. The SFPUC knows all this, but continues to pursue its plan regardless of the

Escalating City employee bloat: the new \$ 400K+ Club

Mayor's Patronage Jobs Alive and Well

by Patrick Monette-Shaw

he problem keeps worsening, with the advent of a new "\$400,000+ Salary Club" beginning in FY 2016-2017 during Mayor Ed Lee's tenure, and the discovery that some City employees are paid bonuses. Since 2013, I have published five articles about the City's growing problem with bloat in City employment. This is the sixth article in this series, focusing on the eight City budgets Lee developed, and the patronage job bloat he introduced.

The Long View

2011–2012 grew by a modest 4.1 percent City's official budget). change increase of just \$266 million. By to our now \$11 billion City budget.

It's no accident Mayor Lee added 8,288 full - and part-time employees since time employees (at 42,271) than the ing 7/1/2019, which will push the 5,112 he took office, a 24.4 percent change authorized FTE headincrease in staff and a 43.7 percent count of 30,835 in the change increase in the total City pay- AAO authorized for roll, increasing the payroll by over a FY 2017-2018 (ending employees earning over planned 31,579 authobillion dollars during his eight-year June 30, 2018). tenure between FY 2010-2011 and FY 2017-2018. During Lee's tenure, the year period between 8,288 new full- and part-time employ- FY 2011-2012 and FY skyrocketed to 15,409 at budgeted 30,835 FTE's ees pushed the total number of employees on the City payroll from 33,983 to 30 in both '12 and '18): billion, a net increase of City Controller's pay-42,271 employees on the payroll he first inherited.

Those 8,288 additional full - and part-time just shy of a billion dol- roll database for the same fiscal year shows

being made. For the latest city fiscal year (July 1-June 30) her office calculated an the 210,000 properties within San Francisco. This represents an 11% increase from 2016-17 assessments. SF assessments have risen the fastest within California for the 3rd year in a row. Part of the reason has been new construction; the new Salesforce tower is valued at \$1,300,000,000 and the Warriors project at \$1,000,000,000 respectively. Changes in ownership in properties also contributed to the increase, although there was a decrease in "Transfer Tax" income for SF in 2017 (\$304,000,000) as compared to 2016's \$411,000,000. Chu "very large" buildings changed hands in 2017, but that a decrease was planned for mento impose California standards. and budgeted.

Chu closed by detailing where Property Tax dollars go: 65% of the monies paid in Property Taxes stay in San Francisco to fund city government and George Wooding spoke next, giving a programs; 34% is transferred to the State of California for Public Education, and the other 1% is allocated to BART.

The next discussion was "Pro" and "Con" takes on **Proposition 10**. On the "Yes on Prop 10" side was George Wooding, who explained that San Francisco first enacted rent control on properties in 1979, and that the Costa-Hawkins act Special Guest San Francisco Assessor was enacted in 1985 to apply limits to Carmen Chu arrived to take the floor when and where rent control can be used. and discuss the ongoing actions of the He said that if passed, Prop 10 would Assessors' office and how progress is ensure that the rent control policies in the 15 cities where it has been enacted in California would still be in effect, and assessed value of \$240,000,000,000 for other cities would be able to enact their rent control measures as well. It could also be applied to single family homes and condos, and keep pricing controls in local government, not Sacramento. According to Wooding, large developers are fighting Prop 10. He believes that we do not have a housing crisis, it is really more of an affordable housing crisis. A single person in SF is considered to be eligible for low income housing if they have a salary under \$117,000 annually. It is estimated that there are 29,000 empty units of housing in the city. He summed it up by stating that it is about maintainattributed the drop in the fact that fewer ing local control and imposing equitable rental controls rather than have Sacra-

Puminations From a Former Supervisor by Quentin Kopp n 1921, H.G. Wells declared: "Human history becomes more and more erased between education and catastrophe." Some readers may still be puzzled by the wealth of ballot measures and candidates, even in this one-party city and one-party state. I think it's important to vote against Proposition 3, which was qualified for the ballot by a distasteful system of its author raising money from entities and individuals who will benefit economically if it passes. If

state legislators acted in such fashion with ballot measures, they'd be denounced and maybe prosecuted for bribery. The California Court of Appeal, however, in the 1990s, decided it was constitutionally permissible for a private citizen to practice "pay to participate" in invalidating legislation sponsored by me and signed by then-Governor George Deukmejian. Also dangerous to housing construction incentive is Proposition 10, which merits a similar negative vote, and again, I recommend strong support for Proposition 6, repealing a 12-cent-per-gallon gasoline tax and increased registration fees. I do so not because a gas tax increase isn't warranted; it is warranted, but I do so because the proceeds will be spent on projects other than highways, roads, and streets. It's a distortion of the reason we've paid gas tax since 1922, and it's financed by the construction companies, engineers, building trade unions, and others who will benefit from its billions of dollars.

As a lawyer and retired judge, I was keenly attentive to last month's con- Maley from Telegraph Hill asked me if firmation proceedings respecting U.S. I realized November 11, 2018 would be Supreme Court Justice Brett Kavanaugh. the 100th anniversary of the signing of Neither his opponents nor Justice Kavanaugh demonstrated good judgment immigrant from a farm in Russia (now and appropriate conduct. by Steve Lawrence

n early October SFPUC's Water Department outlined some projects needed to make up lost water supply if the State issues the order it has proposed. There is still a chance that the State will not crimp the water supply quite as much; settlement negotiations hold a ray of hope.

One hundred million gallons per day which our water system has been made ready. Another solution would be to find storage—about two-and-a-half Hetch-Hetchies' worth. The need is not immediate; it grows to that in 2045. Needless to say, finding this much is hard.

But projects to make up as much as half of the shortfall have been identified. They range from ones that might be accomplished in ten years to those likely to take thirty years.

"Purified water" is in San Francisco's future. It is wastewater that is purified so doesn't expect settle- concept, but necessary." that it is safe to drink. Hardly a pleasant concept, but necessary.

One reason that so much water must be found—100 mgd is nearly half of what we use per day, average—is that we are second in line: our water rights are junior to those of agricultural irrigation districts, so in drought our water is severely reduced. Another hard reality is that SF has promised to supply communities along the line from Hetchy to SF. We've promised to supply them with 184 mgd, which is about what the system was supplying during the last drought.

within reasonable bounds. Today they

Today some commissioners have special constituencies. There is the labor commissioner, who safeguards and maximizes union jobs. There is the environmental commissioner with special office to protect the environment and promote the causes of the environmen-

particular agenda, and add, by about 2040 rates San Francisco's future. It is a commissioner who are projected to reach wastewater that is puri- is supposed to reprecolumnist drink. Hardly a pleasant is an esteemed community member and this is extra duty and pres-

tige. Finally there is a victory. With the State's plan SF will be up commissioner who once was general manager; he provides expertise and continuity. (Commissioners can display surprising ignorance.)

Now commissioners are appointed by the mayor. Progressive-environmentalist would have commissioners elected. Undoubtedly they hope to dominate the commission. To do so they would run a slate of candidates. Once dominant, rate-

Voters are already overwhelmed with would probably say this is still true. But too many choices. An environmental slate could easily win. Unlike other departments, SFPUC borrows and spends without voters authorizing bonds. Rates have been rising at more than three times inflation, and are sure to continue at that rate or more as things stand.

> As it is now, the Commission reviews and sets broad policy. The GM and his assistant GMs, for Water, Wastewater and Power, and more, propose policy, budget and actions. The Commission usually approves.

age over the next four years). Absent the \$2B

Purified water" is in the ratepayer. There is meetings, public speakers can and do ask for things, environmentalists most frequently. Whatever is spent must be paid 2.5% of median income, an aspirational ceiling. So that it is safe to sent the ratepayer, but hardly ever seems to; he spend today, pay tomorrow. Money is committed, bonds are sold, and bonds are repaid over thirty years. On the order of a billion dollars a year is spent at present.

> The Commission is a loose gatekeeper. To give one example, it took little over one minute for the Commission to authorize the spending of nearly a billion dollars.

> If San Francisco moves to elect commissioners, expect that the progressiveenvironmentalists will try to dominate; if they do, the water available to city users will shrink, and its price will rise.

> Steve Lawrence is a Westside resident and SF Public Utility Commission stalwart. Feedback: lawrence@westsideobserver.com

The cost of projects to make up as much would be needed during a drought, for as half of what's needed if the State plan is implemented is about \$2 billion. That would raise rates 8-17% (\$9-20/month) tal community. There is the legacy commore than rates are already expected to missioner who has served forever; she rise. Rates are set to rise quite fast as it has pet causes and interests, though no

is (7.6% per year averyears). Absent the \$2B

A better way to allocate water supplies

by Brian Browne

In 2004, while serving on the derailed Revenue Bond Oversight Committee (RBOC), I wrote an article for Reason Foundation Western Water Wars - efforts the rest of Hetch Hetchy supplies alloto take over San Francisco's Hetch Hetchy system¹. BAWSCA achieved this in 2009 when San Francisco entered into a secretly negotiated water-contract with the wholesale customers.

The secret negotiators let the penin- costs or opportunity cost. Water rates sula customers "buy" their part of our Hetch Hetchy system based on two key accounting gimmicks. The negotiators used a depreciation term of approximately 20-percent (if that) of the system's realistic life-expectancy, and the accumulated over time investments dollars were unadjusted for inflation. Changing these two unrealistic assumptions to a significantly longer term depreciation (some water systems are thousands of years old) and adjusting actual expenditures to account for inflation would have increased considerably the value of the now ceded segment of the regional water system assets.

would increase. These increases would negate the need for fiddling with the price system through free low-flush toilets and ascending tier pricing type regimes. All these novelties cost someone in the rate paying class (cross subsidization). There are just no free lunches, not even in SF. The suspicion exists that it might also stimulate more significant innovations in managing the system.

The 2009 agreement gave the peninsula customers an ad infinitum guarantee of 184 million gallons per day (MGD) and San Francisco 81 (to be made up by adding 4 MGD of recycled water). This secretly determined allocation is unfair A better approach to valuing infra- based on intra-contract period (1985structure would be at its replacement 2008) sales of 86 MGD for San Francisco

percent of average sales 1985-2008), and mize the current over bloated role of cated by a competitive bidding process between all wholesale customers and San Francisco. This would ensure water was bid to its highest use value. There could be a sales tax to subsidize citizens without the means to acquire adequate

The SFPUC might consider resigning as a self-regulatory agency and turning

WOTPCC (Cont. from p. 3)

of Costa-Hawkins and allow cities to impose rent control on existing singlefamily homes and condos, as well as setting pricing for yet to be developed projects. Farrell believes that, if passed, it could actually reduce the number of housing units on the market as landlords and property owners could decide to sell the units and take them off the rental market, rather than be constrained by controls. This would tighten the inventory and result in additional evictions using the Ellis Act to clear properties for subsequent sale. He believes that Costa-Hawkins guarantees some sort of sanity the housing crisis worse.

Stephen Roditti, of the Monterey Heights Homes Association, followed with an update from the "Hubhaus" case in his neighborhood (at 255 Maywood). The property, which is currently housing 7 tenants in a single-family house has been declared in violation of the building and planning codes and the owner of the home has been told to abate the

An update on the issue of "non-active" homeowner associations was tabled until the November meeting.

The meeting was adjourned at 9:00 PM. The next meeting of the WOTPCC will be on Monday, November 26 at 7:30 PM on rental pricing and a repeal will make at the historic Forest Hills Clubhouse. For more information see the WOTPCC website (www.westoftwinpeaks.org).

Pizzas for Potholes (Cont. from p. 1) for San Francisco's ailing infrastructure.

According to its press release: "Domino's Pizza, the largest pizza company in the world based on global retail sales, is saving pizza, one pothole at a time. Cracks, bumps, potholes, and other road conditions can put good pizzas at risk after they to help smooth the ride home for their freshly-made pizzas."

"Have you ever hit a pothole and heightened when you're bringing home a carryout order from your local Domino's store. We don't want to lose any great-tasting pizza to a pothole, ruining a wondermuch about its customers and pizza to let San Francisco companies earning more that happen."

Of course, Breed didn't endorse Proposition C. Her press release stated, "We all The goal is to help millions of young recognize the crisis on our streets; we see mericans prepare for college through it every day. So I understand why Propo advanced placement courses and stan- sition C sounds appealing, and I know those who support it are well-inten-Facebook is also planning to build a tioned. But as mayor, I must weigh more than popularity and good intentions. I our city, and thus, upon lengthy analysis and consideration, I cannot support Proposition C."

Really? Breed cannot support Proposition C because Evan Williams donated at least \$150,000 to her mayoral campaign. The Twitter co-founder (and former CEO) has given his cash to a pair of super PACs supporting Breed. Williams, now the CEO of the publishing platform Medium, has an estimated net worth of \$2 billion.

The "It's Our Time, SF Women Supporting London Breed for Mayor" independent expenditure committee received one of its biggest donations from Williams who gave the group \$50,000.

The "Edwin M. Lee Democratic Club"

Hiring Bloat (Cont. from p. 2) both '09 and '18):

The number of employees earning over \$150,000 in total pay grew by 3,528, from 1,944 to 5,472, a 181.5% change increase since FY 2008-2009. Their total pay (including base + overtime + "Other Pay") jumped from \$338.4 million to just under \$1 billion, a 199.5 percent change increase.

The number of employees earning over \$200,000 in total pay grew from 211 to 1,410 — a 568.2 percent change increase. Their total pay (including base + overtime + "Other Pay") jumped from \$47.2 million to \$322.1 million, a 583.1 percent change increase.

The income inequality between the various salary ranges for only FY 2017-2018 is striking.

The 26,682 City employees who earned less than \$100,000 in FY 2017-2018 had average salaries of just \$50,873. The 15,409 employees earn-

ing over \$100,000 annually earned

ally each averaged \$144,666. 5,472 employees

who earned over \$150,000 annually regular base pay for doing the jobs they in total pay each averaged \$185,205. were hired to do. The 1,410 employees who earned over Where's the Auditors? \$200,000 each averaged \$228,468.

The New "\$400,000+ Club"

When Lee inherited former-Mayor Newsom's final budget for FY 2010-2011, there were zero employees who earned over \$400,000 in total pay.

By FY 2016-2017, Mayor Lee suddenly added three employees who earned over \$400,000 in total salaries, at a cost of slightly under \$1.4 million. Then in FY 2017-2018, in the last City budget Lee submitted, suddenly there were nine city employees who earned over \$400,000, at a cost of slightly over \$4 million.

"\$400,000+ Club":

Four were public safety officers who earned both overtime pay and "Other Pay" towards their total pay.

Battalion Chief Kirk Richardson's

\$148,520 "Other Pay" included \$120,946 payout (81.4%) of his total "Other Pay" for accrued vacation pay, sick pay, and other "cash out" payments when he retired on May 5, 2018 just before the end of the fiscal year. The rest of his "Other Pay" was for additional retention pay and premium payments.

Four were employees of the San Francisco Employees' Retirement System

Of SFERS' four employees in the "\$400,000+ Club":

The four were paid at least \$760,355 in bonuses, ostensibly for increasing the overall value of the pension fund. Shouldn't they be doing that, without being paid bonuses?

Adding in the bonus paid to Diane Chui-Justen, bonuses paid to these five SFERS employees is well over threequarters of a million dollars in bonuses

The City Controller's Office did not respond The 26,682 City employees a records request average who earned less than \$100,000 ... asking salaries depending had average salaries of just bonus payments on their total sal-ary ranges.

As the Westside Observer reported in "Who's Auditing Mayor's Hiring Binge" in February 2017, it doesn't appear either the Board of Supervisors or the City Services Auditor unit within the City Controller's Office are interested in auditing the bloat of City employees during Ed Lee's watch as mayor. Taxpayers deserve such an audit.

An expanded version of this article, with hyperlinks, additional discussion, and tabular data is available on the author's web site at stopLHHdownsize.com.

Pizzas for Potholes (Cont. from p. 5)

independent expenditure committee is appropriately named, as the group representing our tech-loving former mayor attracted tens of thousands from wealthy tech donors to support Breed. Williams donated \$50,000 to this group, too.

Donations to the "San Francisco Firefighters Local 798" independent expenditure committee included \$50,000 from Evan Williams, CEO and founder of the tech-blogging tool.

If William's doesn't want Breed to increase homelessness funding by supporting Proposition C, she won't. Facing re-election in 12 months, Breed wants to do another report on homelessness in San Francisco. This exhibits

the danger of campaign funded influence. San Francisco has to represent its citizenry, not the people who make large contributions to politicians.

It might be that companies and individuals are reaching such a level of size and wealth that it no longer makes sense for them to wait for government to fix their problems. While its good of them to do this, inequality itself is an ominous trend for society. When city government becomes more efficient, private parties will be able to do less. My compliments to Marc Benioff's push for social responsibility.

November 2018 ·

As Autumn has come upon us and the holidays fast approach there are many things to do and explore in our fair city – here are but a few:

Remembering WWI...The "Great War" ended 100 years ago... Like many of you, my grandfather fought in World War I, "The Great War" and the "War to end all Wars". Sadly, that didn't turn out to be the case, but four years of bloodshed and horror was finally ended in **November of 1918**, with the signing of the armistice. Today, we celebrate that event as Veteran's Day, and there will be a parade and ceremony at 11am on November 11th at Fisherman's Wharf.

New Italian Cinema...SFFILM has announced that its third annual SF Honors program will acknowledge the outstanding achievement of this fall's Ruth Bader Ginsburg biographical drama On the Basis of Sex, directed by Mimi Leder and released by Focus Features and Participant Media, with a public screening event Saturday, November 10, 6:30 pm at the Castro Theatre. Lead actors Felicity Jones and Armie Hammer and screenwriter (and nephew of Ruth Bader Ginsburg) Daniel Stiepleman will attend in person and participate in a special pre-screening award presentation followed by an in-depth post-screening conversation about their work. Film tickets: \$14 general; \$13 seniors, students and persons with disabilities; \$12 Italian Cultural Institute members. Passes: \$60 for Italian Cultural Institute members and \$70 for the general public. Box office info: (415) 552-5580 or www.newitaliancinema.org.

Aging Well Symposium... Live Your Purpose: Inspirational Stories of Building Legacy

Meet at the Sequoias for a day of speakers who have created lasting legacies. Each of us creates our own legacy, a celebration of what is important to us at the most basic level of life and how this focus guides our actions and affects those around us.

Guest speakers include: Fernando Chavez, attorney and activist / Leah Garchik, Chronicle columnist / Juanita Tamayo Lott, author and activist / Nate Oliver, professional baseball player and Bob Nelson, NASA scientist and photographe. Please RSVP to fmitchell@ncphs.org (Cost is \$10 at the door and includes lunch)

Tax Tips for Your 2018 Tax Return... The San Francisco Public Library will be holding a tax workshop at the main library on Larkin St. in November.

Tax season is around the corner! Take advantage of this workshop offering a summary of your 2018 income tax filing requirements, offered by the Justice & Diversity Center's Low Income Taxpayer Clinic and the San Francisco Public Library. Important topics for tax filing will be covered, including tax filing requirements and deadlines, tax record-keeping, and free tax preparation services available for low-income individuals and families. We will also discuss major differences you might see on your 2018 tax return, such as the new tax forms, changes to deductions and exemptions, and updates to the Child Tax Credit.

Where and When: November 20 • 6—7:30 pm • SF Main Public Library • 100 Larkin Street, Latino/Hispanic Program Room – Lower Level

Holiday Crafts at the Randall Museum... Randall Museum's annual Holiday Crafts Day is back at the newly renovated museum on Corona Heights! The museum will be bustling with fun holiday craft activities for the whole family. Kids can create one-of-a-kind hand-made gifts and items to decorate their homes. Learn how to roll your own beeswax candles and make handmade lip balm, then sweeten the season by creating a candy house with marshmallow and gumdrop chimneys, licorice doors and peppermint siding. Explore new areas of the museum for unexpected surprises while enjoying favorites likes building toy trains, soapmaking and more!

What: Holiday Crafts Day - Winter Holiday Craft Activities for the Whole Family - 10 am - 2 pm, Saturday, December 1 • Randall Museum 199 Museum Way Randall Museum is a facility of the San Francisco Recreation & Park Dept.

Ages: Kids Ages: infant -12 and their families (kids under 8 must be accompanied by an adult) Cost: FREE Info: (415) 552-3542 or www.randallmuseum.org

November at our local Merced Branch library...

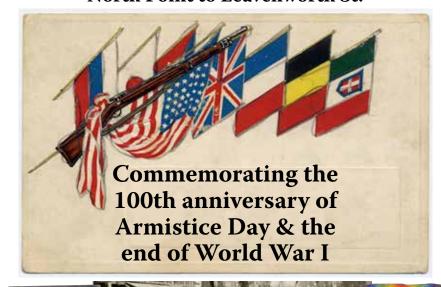

Programs for Adults:

Native Californians: A Brief History in Film – Wednesday, November 14 | 7-8:30 pm In observance of Native American Heritage Month, a program on the history of Native Californians will be presented. A brief presentation will be followed by the screening of California Indians, parts 1-4. The films cover Northern and Southern California indigenous peoples including the Miwok, Yurok, Karok, Hupa, Maidu, Wintun, Patwin, Pomo, Costanoan, Yokuts, Gabrieleno, Chumash, Luiseno, Diegueno, and Cahuilla tribes as well as Ishi, the last known survivor of the Yana people. Merced Branch Library Book Swap – Saturday, November 24 | 3-4:30 pm

Bring in a book (or 2+) from home that you want to trade in for another. Browse a variety of book choices available to swap. Books should be in good condition. **Book-A-Librarian: Learn Basic Computer Skills** Choose a topic—searching library databases, setting up an email account, or surfing the Internet. Basic mouse and typing skills required. Sign up in-person or call to schedule a 45-minute one-on-one appointment.

Veterans Day Parade

Merced Branch, SF Public Library | 155 Winston Dr. | (415) 355-2825 | www.sfpl.org

Dust off your top hats and fingerless gloves and get your "Dickens" on...Mark your calendars for November 17 through December 23 as the Great Dickens Christmas Fair returns to the Cow Palace as well. Now in its 36th season, The Fair will run Saturdays and Sundays (as well as the Friday after Thanksgiving) offering visitors a delightfully

 $immersive\ holiday\ experience\ without\ rival.$

Tickets went on sale September 4^{th} and to ensure the comfort of all guests, there will be a limited number of tickets available for each day of the Fair. As with many other theatrical events, 'Select Day' tickets must be purchased for the actual day you wish to attend. After tickets sell out for any given day, there will be no more tickets available for that day, so purchase early to ensure you are able to attend on the day(s) you prefer. All tickets are non-refundable, they are fully transferable to another person.

Admission Prices at the Gate (if tickets are available): Adult/General Admission (13+): \$30. / Children (5-12yrs): \$14. (Children under 5 are always free.) / Pickwick Club 2018 Season Pass: Available online through Dec. 9th at \$120. per pass, plus a convenience fee charged by Eventbrite (a \$390. value!) / Adult Twilight Tickets, valid after 3 pm: \$18. (available at the box office only). / Child Twilight Tickets, valid after 3 pm: \$10. (available at the box office only).

Bring an **unwrapped NEW toy** to the Fair box office and receive a \$5 discount off one adult ticket! Toys will be given to the Daly City Fire Department's "Operation Santa Claus" toy drive, now in its 69th year of bringing holiday cheer to less fortunate families in the Daly City/Colma/Broadmoor area.

Parking is available for \$12 per vehicle (charged by the Cow Palace). The Fair offers a convenient shuttle from the Glen Park BART station. For questions about tickets, please contact tickets.dickensfair@gmail.com

Do you have an event, a neighborhood fact or observation to share? Drop us a line at mitch@westsideobserver.com and share your ideas or just let us know what you think.

Tue Nov 27 | 6 pm | A history of Bay Area food and drink innovation—short tasty talks from local food and drink makers, pop-up tours of the mint's vaults and historic spaces, and small bites, cocktails, beer, and wine will be available. Music: Banda Sin Nombre, a Mission District street band. \$50. US Mint, Mission & Fifth St.

WED • GLIDE HOLIDAY JAM

Wed Nov 28 | 5:30 pm | Love Overcomes celebrates irresistible hope and unconditional love and helps raise funds for Glide's Daily Free Meals program. Grammy award-winning singers India. Arie and Lisa Fischer, the GLIDE Ensemble featuring Vernon Bush and The Change Band + special sur guests at The Masonic, 1111 California. Food and drink from the Bay Area's finest restaurants and beverage companies. \$65-250.

TUE • SF STAIRWAY WALKS

Tue Nov 27 | 7 pm | Stairway Walks in San Francisco with guest speaker: Alex Lemberg, 2266 California (at Webster) SF History Assn.

FRI • NIGHTMARE BEFORE CHRISTMAS

Fri Nov 30 | 8 - 9 pm | The plot to take over Christmas in Tim Burton's fantastical comes to life like never before as the SF Symphony performs Danny Elfman's delightfully quirky score live with the film on the big screen Davies Symphony Hall 201 Van Ness Avenue. \$80-\$160.

SAT • 34TH CABLE CAR CAROLING

Sat Dec 1 | 12:30 pm | Institute on Aging's 33rd An-

nual Cable Car Caroling Fundraiser at at Roosevelt High School (Arguello at Geary) Mix and mingle then board cable cars to serenade more than 1,000 seniors. Reconvene at 4pm for dinner. Tix: \$75, 50 seniors/students, or 25 kids. Proceeds: the only 24hour, toll-free hotline for seniors and disabled.

TUE • CONSERVATORY FREE DAY

Tue Dec 4 | 10 am-4:30 pm | The oldest existing conservatory of its kind in the Western Hemisphere. 100 J F Kennedy Dr. Free every first Tuesday.

TUE • DE YOUNG FREE DAY

Tue Dec 4 | 9:30 am - 5:15 pm | Art from 17th-20th centuries, native Americas, Africa, & Pacific. 50 Hagiwara Tea Garden Drive. Free first Tuesdays

TUE • LEGION OF HONOR FREE DAY

34th Ave. Free first Tues.

|WED • GWPNA

Wed Dec 5 | 6:30 pm | Greater West Portal Neighborhood Assn., West Portal Playground Clubhouse, 131

SAT • OMI NEIGHBORS

Sat Dec 15 | 1 - 3 pm | No meetings in Nov or Dec. Instead — Annual Holiday Toy Giveaway at Minnie & Lovie Rec Center @ Capitol and Montana.

As the crows — and other birds — fly

e tend to think of birds as very similar, but, according to Eddie Bartley, they can be as different from each other as a giraffe is from a mouse. Bartley is a docent at the Golden Gate Raptor Observatory in Marin and teaches Master Birder classes in migration at the California Academy of Sciences.

This difference in bird species is especially true when then fly off to Argentina for the winter. it comes to migration, a stressful and risky venture for birds. We still need to learn a lot about the how and why residents or sedentary birds. The California towhee

of migration. We can deduce that the birds are searching for plentiful food, for a climate conducive to raising Overall, birds are like people—they the place to be...almost fledged. are looking for a good income and a safe neighborhood in which to raise one-half of all species of migrating can also present survival the kids.

tion, and the type of migration can Francisco. even vary within a species. Some birds migrate thousands of miles and others just hop over to a nearby nesting area. However, within a given species there is a typical pattern. According to Bartley, "Every species has its own story."

For example, the Orange-crowned Warbler lives high in the Sierras in the summer and drops down in elevation in the winter. This is an example of elevation migration — birds moving uphill and downhill, according to the

The delightful Sooty Fox Sparrow is a mid-distance traveler. The middistance migrants can move from southern Alaska to British Columbia or even as far as the Bay Area.

The neo-tropical migrants, such as the North American Warblers, can move from the northern boreal forests and tundra to Central America or even South America. Wilson's Warbler Swainson's Hawk Photo Eddie Bartley breeds in the Bay Area and then journeys to Mexico for the winter.

Some birds don't migrate. They are the permanent

likes to hang out around home, as does the Wrentit. In fact, the Wrentit is such 📕 🖿 If you like looking a couch potato that it rarely travels young, and for safety from predators. at birds, San Francisco is more than a mile from where it first

birds in the United States problems for a species. At one time, There are many kinds of bird migra- have been seen in San Wrentits were common in San Francisco. They have since been almost eliminated from the City (or extirpated, in bird lingo) due to loss of their preferred habitat.

> Some birds within the same species migrate differently from each other. Our Anna's Hummingbird can be seen zooming around San Francisco year-round, but some Anna's fly off to winter in the desert and then return to San Francisco in the summer. Other Anna's breed high in the Sierras and drop down to the desert in winter.

> And then there is post-breeding dispersal. It is not really a migration but rather the kids moving out of the house to find a new place to live, court, and produce grand-birds. They won't return home, to live in that spare room. Many raptors raised in Northern California end up dining on rodents in the Salinas Valley for their first winter and fan out from there to find new

And some birds are either indepen-

dent minded or just get lost, usually in their first year. Swainson's Hawks breed in Northern California and They are the vagrants. These are the birds you read

about in the newspaper, with photos of large groups (flocks?) of people with giant, long-lens cameras gathering for a glimpse of the bird of a lifetime. Vagrants may act as pioneers, looking for a new home to extend the range of their species.

If you like looking at birds, San Francisco is the place to be. The Bay Area is located along the Pacific Flyway, a major north-south migratory route extending from the Arctic tundra to South America. According to Bartley, almost one-half of all species of birds in the United States have been seen in San Francisco.

Many birds raise their young here in the spring and summer, and so autumn is when we have the most birds. Sadly, the first winter for young birds is when they are most likely to expire. Some species have only a 30% survival rate! They are lost over the winter mainly due to starvation, predation, and disease.

You can help the birds who are just passing through on their arduous journeys as well as those who stay for the winter (or the summer). Bartley advises that you can "paint your garden" with birds by growing those plants that attract the birds that you want to see. Keep your housecat indoors (better for the cat, too), provide fresh water, keep your bird feeder clean to prevent the spread of disease, and don't use rodenticides, herbicides, or pesticides. Songbirds, in particular, rely on insects. As Bartley says, "They don't call them flycatchers because they eat fruit."

Support legislation on "bird-safe" windows and the Lights Out for Birds campaigns. Many birds navigate by the stars, and artificial light can be a big problem for them. We'll cover the "how they do it" of migration in a future article.

And the crows - how do they fly? Well, according to the Cornell bird website, some migrate, some are resident, and sometimes both behaviors take place in one population of crows.

Katherine Howard is a member of the Executive Committee of the SF Group of the Sierra Club.

Want to learn more?

Both migrating raptors and the raptor dispersal can be seen from the Golden Gate Raptor Observatory in Marin, which hosts birdwatching during the migration seasons. www.parksconservancy.org/programs/ggro/`

SFERS Churning (Cont. from p. 6)

Fact Sheet, dated September 30, 2008 that listed \$711 million in city employee assets. In the same month, SFERS' board members were already discussing a \$60 million deficit, a deficit that would eventually exceed \$100 million. How many of the city employees fleeing the spiraling financial crisis to the perceived safety of ING's Stable Value fund purchased 85 cents worth of assets for a full dollar, because they were conned by ING's blatant misrepresentation of asset values?

By January 2009 Great West Insurance, as the new deferred comp vendor, had to lend the Stable Value Fund the missing \$100+ million that ING had misinvested. Great West then reduced interest paid on the Stable Value fund for subsequent city employees until the ING loss was repaid. Conceivably, ING's status as the largest donor to the POA contributed to the union's silence about this *Ponzi scheme*.

If Callan's and SFERS' staff's decision is ratified by the Retirement Board, it will make Voya (formerly named ING) the sixth deferred comp provider in the past 22 years. Folks, this squarely meets the legal definition of illegally churning

It's also unconscionable that Callan and SFERS's staff are weighing ING/Voya's smiling presentation skills as 30% of the selection process, while giving absolutely no weight to ING's culpability in causing \$100+ million of city employees' assets to

Believe it or not, San Francisco's city 2. sfpoa.org/journal_archives/POAJournal_ employees' \$3+ billion in deferred comp April2014.pdf

assets is currently cornered between two insurance annuity vendors:

The elusive Wren-tit Photo: Eddie Bartley

1) Promoted by the unions, Prudential, structured so that no one at SFERS or the Retirement Board knows what city employees are actually invested in, or where the assets are held.

2) Endorsed by the SFERS administration, Voya/ING, who has a track record of misrepresenting asset values and blowing \$100 million of city employees' assets.

With the Retirement Board's index finger raised to gauge the political winds, SFERS deferred comp participants should expect the adjacent, longer finger to be the one the board reserves for them (again). Taxpayers should take note that SFERS' and the Retirement Board's inability to navigate political pressure and complex products does not bode well for the larger \$20+ billion public employee and taxpayer-funded pension that is drenched with SFERS' self-praise, while stigmatized by subpar performances.

Lou Barberini's family lives in the West Portal area. He has an MBA in taxation, worked for investment companies, and a Big Four CPA firm. Lou is a SFERS participant. He currently provides fiduciary, investment, and tax planning services through Nich Capital Partners (Nichcapitalpartners.com). He can be reached at lou.barberini@gmail.com.

Open House on the Historic Preservation Design Guidelines.

Thursday, November 8 • 5:30-8 pm • 1650 Mission Street, Suite 400 San Francisco Planning is working with the local community to develop a comprehensive set of design guidelines for historic structures and districts specific to San Francisco.

RSVP: visit https://sfplanninghistoricdesignguidelines.eventbrite.com to RSVP for the open house. This event is free and open to the public. RSVPs are helpful to ensure we have enough materials.

As your Commissioner I'll focus on core functions communication, transportation, facilities-to strengthen our school district and make SFUSD a better neighbor.

Smoking: Its Effects on the Body

by Anise J. Matteson

November 15 is Great American Smokeout Day!

tting digesting a delicious brunch of cinnamon bagel, open-face omelet with medium cheddar cheese, fresh peach cubes and a glass of orange juice, listening to classical music as I read the West Portal Monthly—Surfrider: 'Hold on to Your Butts,' Taraval cigarette filter recycling efforts helps reduce beach litter by Rae Doyle (Sept.) catches my attention. I am deciding on a topic for the Nov. article. Smoking seems like the choice after reading ..." to make matters worse, they are also toxic. They trap nicotine, arsenic, formaldehyde and heavy metals like lead and cadmium and leach them into water and soil."

Rather than focusing on the effects of **ETYMOLOGY** cigarette butts on the environment, I will focus on smoking and how it effects the into the lungs. human body.

Tobacco smoke is an environmental toxin to which San Francisco residents, tourists, and visitors are involuntarily subjected.

STATISTICS

More than 43 million people in the United States smoke cigarettes, about 1

Smoke particles are as small as 1/70,000 in. (0.00036 mm). As many as 25% of them may be trapped on the linings of the lungs and can also cause excessive scar tissue within the walls of the lungs. Probably help cause progressive destruction of the walls of the air sacs in the lungs of long-term smokers.

85% of cases of lung cancer are due to long-term tobacco smoking. About 10-15% of cases occur in people who have never smoked—caused by secondhand smoke. Worldwide in 2012, lung cancer occurred in 1.8 million people and resulted in 1.6 million deaths. Overall 17.4% of people in the U.S. diagnosed with lung cancer survive five years after

An estimated 49,670 people will be diagnosed with oral cavity or oropharyngeal cancer in 2017, according to the American Cancer Society. And 9,700 of these cases will be fatal.

First-hand smoke. What is inhaled

Second-hand smoke. A mixture of exhaled smoke and other substances leaving the smoldering end of the cigarette that enters the atmosphere and can be inhaled by others.

Passive smoking. The inhalation of smoke from another's smoking. A cause of lung cancer in nonsmokers. Can be defined as someone living or working with a smoker. (Marijuana contains many of the same carcinogens as tobacco smoke.)Exposure of persons who do not smoke tobacco products to the toxic gases released by the burning of these products in their homes, workplaces, or recreational environment. Exposure to environmental tobacco smoke has been linked to allergies, asthma, cardiovascular diseases, lung diseases, and strokes, among other diseases and conditions.

Third-hand smoke. Residual nicotine and other chemicals left on indoor surfaces by tobacco smoke.

Exposure to chemicals: 1. By touching contaminated surfaces. 2. Breathing in the off-gassing from these surfaces.

Third-hand smoke clings to clothes, furniture, drapes, walls, bedding, carpets, dust, vehicles and other surfaces long after smoking has stopped. The residue builds up on surfaces over time and cannot be eliminated by airing out

Extent of Injuries and Fatalities in All Properties

	Residential (1 & 2 Family)	Residential (Other)	Non-Residen- tial
Fires	32%	15%	53%
Injuries	32%	35%	33%
Deaths	55%	30%	15%

Cigarettes: The Cause of Fires

Smoking is considered the nation's leading preventable cause of death. Cigarettes are the leading cause of fatal fires, responsible for about a quarter of all U.S. fire deaths.

Cigarette fires cause close to 1,000 deaths and 3,000 injuries each year in the U.S., according to the National Fire Protection Association (NFPA). The igniting source in fires, cigarettes are responsible for over 20% of all fire deaths. Property loss: over half a million dollars. Economic costs, health care, productivity losses, and human cost of pain and suffering raise total costs to an estimated \$4 billion.

Fires attributed to dropped cigarettes: one death to every four injuries. (e.g., Dropped cigarette burns through the cover of a seat cushion or mattress, starting a fire which may smolder for hours.

Vulnerable to smoking-fire deaths: elderly, or if elderly smoker uses alcohol or sedating drugs.

Hospital charges for cigarette fire admissions: Average over \$100,000 per admission. (May 2000)

Treatment charges for initial hospital stay: At \$100,000 per admission—estimated to exceed \$65 million. (May 2000)

rooms, opening windows, using fans or air conditioners, or confining smoking to only certain areas of a home.

At-risk: Children and nonsmoking adults might be at risk of tobacco-related health problems when they inhale, swallow or touch substances containing third-hand smoke. Infants and young children might have increased exposure to third-hand smoke due to their tendency to mouth objects and touch affected surfaces.

Cigarette stench. Others can be exposed to the toxins that cause your hair and clothes to smell.

ADVERSE EFFECTS

The effects of smoking causes: Looseness of the under eye skin. Uneven skin tone. Sagging skin and wrinkles. Sagging arms and breasts. Lines and wrinkles around the lips. Age spots. Damaged gums and teeth. Stained nails and fingers. Hair loss. Cataracts. Psoriasis. Eye wrinkles (Crow's Feet). Brittle bones. Heart disease and ED. Reduced athletic ability. Reproductive issues. Early menopause. Oral cancer. Lung cancer. Ciga-

THE PARTS OF A CIGARETTE

Cont. p. 13

Do you have a pinched nerve? We can help.

Dear friend,

Last year more Americans were killed by and 160,000 were when the drugs were

prescription drugs than by guns, AIDS, suicides and terrorists combined ... But we'll get to that in a minute.

Let me start by explaining the photo in this letter. You know when I meet people in town they usually say, "Oh yeah, I know you, you are Doctor Meakim. You have been on the corner of Beach and Jones for years"...(and we just moved to our

me. I'm also the woman hugging her niece at the Jersey Shore in the picture.

Seventeen years ago something happened that changed my life forever. I was a young woman living in Philadelphia when it happened. I was driving with a friend when she missed a stop sign and rammed into the side of another car. We were all shaken up. The police were called and we all went to the hospital. No one was bleeding, so the doctors took some x-rays of our neck, gave us pain meds and sent us on our way. The next day I woke up with pain everywhere and it just kept getting worse. For years I tried everything that I could find. For an escape from the pain, I went to medical doctors, physical therapists, acupuncturists, I tried special pillows, and anything I thought might help. I spent a lot of time and money. Along the way I had two more car accidents and the pain kept getting worse and worse. I had developed fibromyalgia, neck pain, midback pain and low-back pain with tingling and numbness down my right arm and leg. I was scared that something was really wrong with me. This could not be normal. I was only 33 years old and felt like I was 100. That is when someone told me about a chiropractor that they thought could help. As a matter of fact, after the first person told me about him, two more people did that same week. So I made an appointment with the chiropractor. Thank goodness that they took the time to help me! I went to his office where he asked me about my problems, did an exam, and took some x-rays of my head and back. After that he pointed out where my nerves were pinched and adjusted them. The adjustment was so light I barely felt it. I began crying as I felt the pain leave my body for the first time in years. It may sound strange, but I was so happy and grateful for the relief that I still thank him every day! After that, I knew what I had to do. I had to become a chiropractor, and that's how it happened!

I have adjusted many children within the first 15 minutes after birth. They obviously didn't complain of neck pain or back pain; I adjust them to keep them healthy... as with all the hundreds of children I care for in my office.

You see, it's not normal for kids to get ear infections, asthma, allergies or a number of other illnesses we see clear up in our office everyday.

When the nervous system is working correctly your internal resistance and healing powers are enhanced.

A healthy family does NOT rely on medication to make it well. My family does not turn to medication to seek health and we don't have a "medicine chest" in our home. Due to years of advertising saturation from the pharmaceutical companies most Americans do seek health from outside in and most families have a "medicine chest" filled with an average of 16 different medications.

In an average year, the World Health Organization (WHO) reports over 1.5 million hospitalizations due to medication.

Last year the WHO reported 350,000 It's hard to believe, I know, but it's true. deaths due to medication people took...

> prescribed correctly. More people died last year from medication than at Pearl Harbor and Vietnam. Amazing huh?

If drugs make people well, then those who take the most should be the healthiest, but this simply isn't the case.

Many people are beginning to understand that health comes from within. This is why chiropractic helps so many people. You see, your

new office on Clement Street). Well, that's body can heal itself. Your body doesn't need any help; it just can't have any interference. With chiropractic, we don't add anything to the body or take anything from it. We find interference in the nervous system and remove it, thus enhancing the healing capacities of the body.

> We get tremendous results ... it really is as simple as that.

> For the past eight years, people from San Francisco and the surrounding area have come to see me with their pinched nerve problems.

- Headaches
- Migraines
- Chronic Pain
- Neck pain
- Shoulder/arm pain
- Whiplash from car accidents
- Backaches
- Numbness in limbs
- Athletic injuries, just to name a few. Here is what some of your neighbors have said:

"I had back pain for 15 plus years and two back operations. Now I play tennis, sit at my computer and enjoy an active pain free life! Thank you Dr. Meakim!" — A. McGrath

"All possible medicines and doctors, you made a miracle taking away my pain!! I am a happy wife and mother again!" — L Igudesman

"I have had chronic neck, shoulder and arm pain for the last 4 years. After seeing Dr. Meakim I can now twist off caps, button/zip my own pants and there is no longer a need for me to ice my arm in the morning and night! I feel more energetic, and can move my arm and neck pain free!" — C. Brubaker

My qualifications:

I am a graduate of Palmer College of Chiropractic, I have published articles in leading chiropractic journals and taught chiropractic to chiropractors! I've been helping your neighbors in San Francisco since 2004. I've been entrusted to take care of tiny babies to athletes that you may

My assistants are Miranda and Nancy and they are friendly and helpful and ready to assist you to set up an evaluation. Our clinic is both friendly and warm and we try our best to make you feel at home. We have wonderful service at an exceptional fee. Our clinic is called Healthy Life Chiropractic and it is at 101 Clement Street (at the corner of Clement St. and 2nd Avenue). Our phone number is 415-751-7071. Call today for an appointment. We can help you.

Thank you.—Dr. Christina Meakim D.C. P.S. When accompanied by the first family member, I am also offering the second family member this same examination for only \$17.

P.P.S. Can you imagine not having to wait at a doctor's office? Well, your time is as valuable as mine. That's why we have a no-wait policy. You will be seen within minutes of your appointment.

P.P.P.S. Of course, all people respond differently to care.

CREATING WEALTH AND OPTIONS FOR OUR CLIENTS SINCE 2002.

Ocean Avenue at Junipero Serra Blvd • April 10,1953. Newscopy: "HOW'S THAT AGAIN?—This little gem of traffic planning is to be found at the corner of Ocean-av and Junipero Serra-blvd, and if you occasionally see motorists driving away from that corner, eyes crossed and mumbling to themselves, here's why. In the left foreground, a sign directs drivers to stay away from the rails. In the right foreground, a sign invites them onto the rails, designating the area as a 'Left Turn Lane.' And to make it complete, at the corner is a sign (arrow) saying, 'No Left Turn'—in history's first example of a street with a split personality." Reproduced by permission of San Francisco History Center, San Francisco Public Library

Smoking (Cont. from p. 12)

Filter. Cigarette filters, usually made of cellulose acetate, remove some of the tar and nicotine particles from cigarette smoke,23 helping block the largest tar particles, letting through smaller bits of tar that can travel deeper into your lungs.

Tipping paper. Traditionally, especially in the past, cigarettes were only paper. Today—every kind of paper and color to personalize cigarettes as much as possible. "Light cigarettes" requires perforated tipping paper to lower nicotine and tar levels.

Cigarette paper. Is made from thin and lightweight "rag fibers" (non-wood plant fibers) such as flax, hemp, sisal, rice straw, and esparto. Available in rolls and rectangular sheets of varying sizes. Has a narrow strip of glue along one long edge.

Tobacco rod [filter rod]. Reduce the harshness of the smoke and keep tobacco flakes out of the smoker's mouth. Purpose: Filter rod is intended to reduce the amount of smoke, tar and fine particles inhaled during the combustion of a cigarette.27

TEMPERATURE

How hot is the smoke you inhale from a cigarette? Temperatures reach 900°C (1652°F) during a puff and fall to about 400°C (752°F) between puffs.

WHAT IS IN A CIGARETTE?

chemicals, including 60 known cancercausing (carcinogenic) compounds and 400 other toxins. These cigarette ingredients include nicotine, tar, and carbon monoxide, as well as formaldehyde, Smoke ammonia, hydrogen cyanide, arsenic

and DDT.

Cancer causing chemicals in tobacco
smoke include: benzene, 2-naphthylamine, 4-aminobiphenol, chromium, cadmium, vinyl chloride, ethylene oxide, processing into produced with cork imitation tipping amine, 4-aminobiphenol, chromium, tobacco through cadmium, vinyl chloride, ethylene oxide, processing arsenic, beryllium, nickel, polonium-210. cigarettes and is

As a cigarette is smoked, the amount of tar inhaled into the lungs increases, and the last puff contains more than twice as much tar as the first puff.

Carbon monoxide makes it harder for nic red blood cells to carry oxygen throughout the body.

Most of the chemicals inhaled in cigarette smoke stay in the lungs. The more you inhale the greater the damage to your lungs.

HEALTH RISK - PERCENTAGE OF TOXINS

ARSENIC [SYMB: As]. A poisonous, grayish-white metallic element. A common environmental toxicant. Toxic if ingested or inhaled in sufficient quantity. Forms: Organic arsenic: is formed when arsenic combines with carbon and hydrogen. Inorganic arsenic: Occurs when arsenic combines with elements such as oxygen, chlorine, and sulfur. Cause Cancer: The International Agency icals in cigarette

Cigarette smoke contains over 4,000 for Research on Cancer has classified arsenic as being carcinogenic (Group 1 classification in humans.). Inorganic arsenic has been linked to lung cancer.

Source of Arsenic Exposure: Cigarette

Arsenic-conpresent in small quantities in cigarette smoke.

Inorganic arseis present mainstream in tobacco smoke and presumably in side stream smoke as well.

Indoor concentration of inorganic arsenic can be much higher than outdoors and is a constituent of third-hand smoke.

Arsenic, along with a host of other toxic chemsmoke exposes smokers (and nonsmokers) who breathe in the second-hand smoke produced by a burning cigarette to cancer-causing agents and poisons.

To date, researchers have identified more than 7,000 chemicals including 250 poisonous and 70 carcinogenic compounds in cigarette smoke.

Toxins: According to a report from the California Air Resources Board and the Department of Health Services, smokers breathe in approximately 0.8-2.4 mcg of inorganic arsenic per pack of 20 cigarettes, with approximately 40% of it being deposited in the respiratory tract. Of that amount 75-80% is absorbed by alveoli in the lungs, making the overall absorption of inhaled arsenic in cigarette smoke approximately 30-35%.

CADMIUM [SYMB: Cd]. A soft bluish-white metal present in zinc ores.Its salts are poisonous. Inhalation of cadmium fumes causes pulmonary edema, followed by proliferative interstitial pneumonia, and is associated with various degrees of lung damage. Cadmium is present in high levels in cigarette smoke. It damages lung tissue and can build up over time to cause kidney, liver, bone and blood damage.

Toxins: A single cigarette typically contains 1-2 mcg of cadmium. When burned, cadmium present at a level of 1,000-3,000 ppb in the smoke. Approximately 40-60% of the cadmium inhaled from cigarette smoke is able to pass through the lungs into the body. Smokers typically have twice as much cadmium in their bodies as nonsmokers. FORMALDEHYDE A gaseous compound, used in the preparation of toxoids from toxins.40

Toxins: In the main stream of smoke of various kinds of cigarettes the amount of formaldehyde vary between 3.4 mcg to 8.8 mcg/cigarette. The irritating effects of tobacco smoke to the mucous membrane are the result of the sum of irritating effects caused by several compounds and particles in the smoke and not only the impact of formaldehyde.

LEAD [SYMB: Pb]. A metallic element whose compounds are poisonous. Accumulation and toxicity occur if more than 0.5mg/day is absorbed.

Toxins: The quality of lead (Pb) inhaled of smoking one packet of 20 cigarettes is estimated to be 0.97-2.64µg. [The concentration of Pb in cigarettes were significantly different between cigarette brands tested.]

Editor's Note: This is part one of the author's extensive report on the dangers of smoking. It is available in full on the Westside Observer website: www.westsideobserver.com/health.html

Money Matters By Brandon Miller

Thanks Giving Can Be An Every Day Event

or this month's column, I'd like to share something that's an essential part of me—hecause I think it was a like to share something that's an essential part of me—because I think it may benefit you, too.

What I'm talking about is gratitude and the role it plays in who you are.

Once turkeys begin filling grocery store meat cases, many people start preparing their "what I'm grateful for" speech for Thanksgiving dinner. While I love that tradition, I don't limit my thanks giving to just one day. In fact, it's something I consciously practice each and every day, in all aspects of my life.

I count my blessings before going to sleep each night. Gratitude is a value I'm working hard to instill in my young twins. And it's something I've woven into the company I helped found, Brio Financial Group. In fact, as corny as it may sound, our team starts off every Monday sitting around the conference table, listing what we're grateful for.

this a column about money? What does being grateful have to do with finances?

Call me an eternal optimist, but I genuinely believe that being grateful for what you have can make you richer. Not necessarily in dollars-and-cents wealth, but in how you feel about your life—which is the grand scheme of things can make so much more important.

Here in the Bay Area, it's easy to feel poor financially. Watching 20-somethings pay cash for multi-million-dollar there. Knowing that you're working to homes after winning the start-up lottery meet your goals can be way more satis-

You can start with being thankful that you're able to live in or near this culturally rich city with fabulous weather and world-class cuisine. A place where opportunities abound for your favorite outdoor activities, whether that's surfing the waves, skiing the slopes or just sunbathing in the buff. And you benefit from the Bay Area's pioneering politics, which often show the rest of the country, sometimes even the world, a better way forward.

What's more, if you can afford to live here—and are reading a column called "Money Matters"—it's not likely that you're poor. So ask yourself this: how much do you really need to accomplish what you want in life?

If you're on track, stop worrying about By now you may be thinking, wait, isn't things that might never come to pass and trap you into thinking that you need even more money. There's no need to gamble on riskier investments for potentially higher pay-offs if lower-risk investments can deliver returns that meet your needs. And realizing that you have enough in you more appreciative.

If you're not yet on track, figure out what's realistic and make a plan to get can evoke that green-eyed monster. Or fying than just pursuing money for its

There's no need to gamble on riskier investments for potentially higher pay-offs if lower-risk investments can deliver returns that meet your needs. And realizing that you have enough in the grand scheme of things can make you more appreciative.

you might feel jealous of friends who can own sake. Plus, you're likely to feel more afford to retire years before they're eligible for Medicare or those who can send their kids to the best schools.

But if you're going to compare yourself to other people, maybe it would be smart to think about populations outside of our insular Bay Area. Look at what you have versus the rest of the country—or better yet, the rest of the world. Could you raise a family on two minimum-wage salaries? Would you want to trade places with someone in Florida or the Carolinas who lost everything to natural disasters and doesn't have insurance or adequate savings to replace it? Aren't you much, much better off than those forced to flee their homeland because of violence or climate conditions?

My point here is that when looking at to find those who are better off than you are, as well as those who are worse off. So instead of measuring what you possess versus someone else, why not focus on the many things in your life that you have to be grateful for?

thankful for what you have when you measure your money by how it moves you closer to your goals versus looking at where someone else stands in their life.

By putting things in context, you'll likely discover that you're richer than you think. Now that's something to be grateful for.

playing favorites or picking winners and losers in the private sector.

Vote Yes on Prop. 5 on November 6th. This would allow homeowners who are 55 or older to sell their home in SF and other urban areas, and purchase a less expensive home anywhere else in California without paying more in property taxes. That will significantly increase the supply of multi-bedroom homes for young, growing families that are currently priced out of the market without having to build one additional unit of family housing here and elsewhere.

Businesses who want to move here or expand operations here should consider decentralizing their operations and seturban core. It would be a win-win-win the ball forward. across the board. Kids graduating from Christopher L. Bowman was born in Chico State, UC Davis, Sac State, Stanislaus State, UC Merced, Fresno State, and Bakersfield State who are receiving cutting edge STEM educations could get good-paying entry level jobs in our

best and most innovative industries, while the corporations would benefit by employing kids fresh out of college for less salary and benefits than they have to pay in SF or the Bay Area. The costs for land and buildings is far less in the rural counties than here, and the rural counties, which currently have unemployment rates as high as 7.5% would benefit by the financial shot in the arm enabling them to provide housing and services for their homeless populations to keep them there, rather than migrating to SF.

Additionally, if corporations expand outside the Bay Area, it will reduce the Inflationary demand for housing here and in our surrounding communities.

We're not advocating that this is a ting up satellite offices in college towns cure-all, but we hope our proposals will in the Central Valley and outside our create a fresh dialogue which will move

Premature Evacuation

s we made our final approach into Paris from our early morning flight from Budapest, I caught a glimpse of the Eifel Tower off in the distance enshrouded in the morning mist. At that point we reminisced about all the fond memories we've shared in this wonderful city, and the question that begged to be asked, "Why are we not spending a few extra days in Paris before heading home?" Fortunately, we had made arrangements through Air France to have someone meet us at our gate once on the ground and the "Meet and Greet" service worked like a dream. Had it not been for that beautiful young woman that met us at the plane's exit, we would still be walking around the airport asking for directions to the next terminal. The line in Passport Control was as at least an hour's wait but we went to the head of the line, crossed under the cloth barricades, and walked right through. In the bus, off the bus, up the stairs, down the stairs and into a private room in Air Frances's business lounge. Certainly worth it.

For the next 12 hours on the way home, we had the time to relive our adventure from Prague to Budapest on Scenic's Jasper that turned out to be more of a nightmare than a sweet dream. Our 4-hour bus ride from Prague to Nuremburg was pleasant enough until we met in the lounge shortly after arriv- A view of Budapest ing on board and were told

to allow passage to our final destination, full day of bus riding that took us from Budapest. Our cruise director, Richard, Krems to Vienna that lasted from 11 suggested that we not unpack our suit- am to midnight, before finally getting

cases until they knew more in a few days. Sure enough, on the 3rd day they loaded us on a bus, suitcases and all, and after a full day of riding on the bus we ended up in Melk where we toured the Abby and

Krems. We eventually found out that tunately, we got to Budapest in the wee the boat had in fact made it through the hours of the morning just in time for our

shallow water, and that we would eventhat there was not enough water upriver tually catch up with the boat. Another

PROTECT OPEN GOVERNMENT!

Prop B would allow the Board of Supervisors to tamper with the Sunshine Ordinance—the nation's strongest transparency law.

"Privacy"— the purported intent of Prop B — is now preempted by State Law (AB 375 - June '18). Only the poison pill remains, (not mentioned in the Voters Guide) hidden down in § (i) — a sneak attack that lets Supervisors tamper with our Sunshine laws.

League of Women Voters San Francisco; First Amendment Coalition; Society of Professional Journalists; SF Chronicle; SF Examiner; SF Labor Council; Chamber of Commerce; San Franciscans for Sunshine; SPUR; Pacific Media Workers Guild; SF Bay Guardian.

I'm Eva Chao, and I'm running to be your BART Director.

My vision for BART is simple:

BART should stand for "Be Accountable to Riders and Taxpayers."

As a graduate of UC Berkeley's Haas Business School, with 20+ years as a S.F. Business Owner and CFO, my vision for **BART** is to put Riders and Taxpayers First! Not Outside Special Interests.

- Prioritize police recruitment and retention, for rider safety and confidence in BART
- Recover up to \$80 million in lost annual fare evasions by modernizing fare-gates
- End sweetheart deals, end sole-source contracts, address unfunded mandates.

Riders and Taxpayers First, Not Outside Special Interests. **VOTE EVA CHAO for BART Board Director** November 6th!

Gladys Hansen

🔰 ladys Hansen was a leading authority on San Francisco's 1906 earthquake and fire, the disaster that killed thousands of people and leveled a quarter of the city. Hansen's interest in the cataclysmic event began in the 1960's when she was head of the California Section of the San Francisco Public Library. Responding to inquiries from people who came

to the library seeking information about relatives lost in the disaster, Ms. Hansen began her exhaustive search of the archives. Early in her investigations, she realized that the announced and long-accepted death toll resulting from the earthquake and fire, 478 souls, was dramatically low. In fact, based on her meticulous study, the number soared; it was closer to three thousand! In a 1986 interview conducted by the San Jose Mercury News, Hansen commented, "It's been nothing but excitement...in saying that something is different from what is in the history books." She has become in expert in debunking the myths created by misinformation (and missing information) stemming from the days when the San Francisco business and political establishment tried to minimize the extent of the devastation and the resulting deaths.

In 1974 Gladys Hansen was placed in charge of the archives of the City and County of San Francisco, and in 1991 she was a founder, and became the archivist, for the Museum of the City of San Francisco, the city's first history museum. In 1994, San Francisco's Mayor, Frank M. Jordan, issued a proclamation to recognize and honor Gladys Hansen as the city's Official Archivist Emeritus.

In addition to her research, Gladys Hansen has made hundreds of appearances before professional organizations, civic groups, and classes to present her findings and to offer her unique insights into the history of San Francisco, the city where she was born and has called "home" for almost nine decades. Hansen has served on the Board of Directors for Drew School, the Saint Francis Hook & Ladder Society, the Chinese Historical Society, and American Women for International Understanding. As a writer and historian, Hansen has authored, co-authored, or edited such books as The Chinese in California: A Brief Bibliographic History (1970), San Francisco, The Bay and Its Cities (1973), San Francisco Almanac (1975, 1980 and 1995), Behind The Silver Star: An Account of the San Francisco Police Department (1981), and Denial of Disaster: The Untold Story of the San Francisco Earthquake of 1906 (1989).

Her most recent book, Earthquake, Fire and Epidemic: San Francisco's Great 1906 Disaster, was co-authored with Richard Hansen and Dr. William Blaisdell, M.D. With a Spring, 2013, release date, the book depicts the years leading up to the earthquake and fire, while providing new insights into, and details about, the catastrophic aftermath throughout the Bay Area during the days, weeks, months and years following that fateful day: Wednesday, April 18, 1906. We miss you Gladys.
